WHAT IS CLIMBFIT?

ClimbFit turns a climbing wall into an interactive experience, giving people a new reason to visit your facility and keep coming back.

It adds an exciting new activity to your existing sports or fitness experience, giving users an approachable way to experience easy to intense climbing challenges through our mobile app.

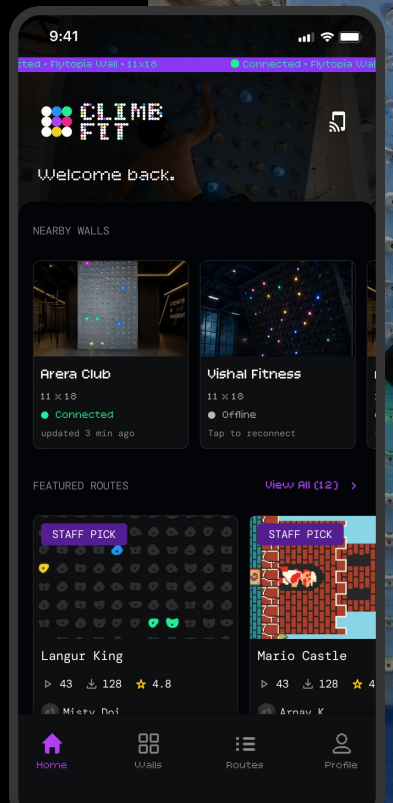

- **More ways to get active**
  Climbing activities that involve strength, balance, coordination and problem-solving.
- **Variety on one wall**
  Different climbing challenges, training drills and group games using the same installation.
- **Options for your facility**
  Modular wall-mounted or freestanding configurations, with installation and onboarding support.

HOW CLIMBFIT WORKS?

Our mobile app controls lights within the climbing holds/rocks, giving the user a gamified experience to create unlimited climbing challenges of all difficulty levels.

- **Choose an activity**
  Select or create a climbing route by turning on the lights through mobile app.
- **Follow the lights**
  Illuminated holds show participants which grips to use, giving each activity a clear goal.
- **Change the challenge**
  Switch activities through the app without moving the holds, making it easier to introduce variety and run different sessions on the same wall.

WHO CLIMBFIT IS FOR

01

Schools

Enrich PE lessons and after-school clubs with interactive climbing. Give students a new way to stay active and parents another reason to value your school's sports facilities.

02

Residential Clubs

Make your clubhouse stand out with an engaging fitness amenity. Give residents more reasons to use shared spaces and connect through climbing challenges and community events.

03

Commercial Gyms

Attract members looking for something beyond a conventional workout. Add variety to memberships and create opportunities for paid climbing sessions, coaching and group bookings.

04

Entertainment Centers

Add an active attraction that families can enjoy together. Offer climbing sessions and birthday packages, with changing challenges that give visitors a reason to return.

05

Yoga, Crossfit & MMA Studios

Complement classes with climbing challenges involving strength, balance and coordination. Offer workshops and combined training packages to attract and engage members.

ClimbFit Training Board

A modular climbing system with integrated LED lighting and app-based route control.

- Engineered steel frame with high-quality plywood panels
- Wall-mounted or freestanding configurations, subject to site requirements
- RGB LED-integrated climbing holds
- Compatible hold sets available through ClimbFit
- Custom-fitted, dual-layer impact-absorbing crash mats

Available Configurations:

S

ClimbFit Board
8x12ft
209 holds

M

ClimbFit Board
12x12 feet
323 holds

L

ClimbFit Board
15x12 feet
437 holds

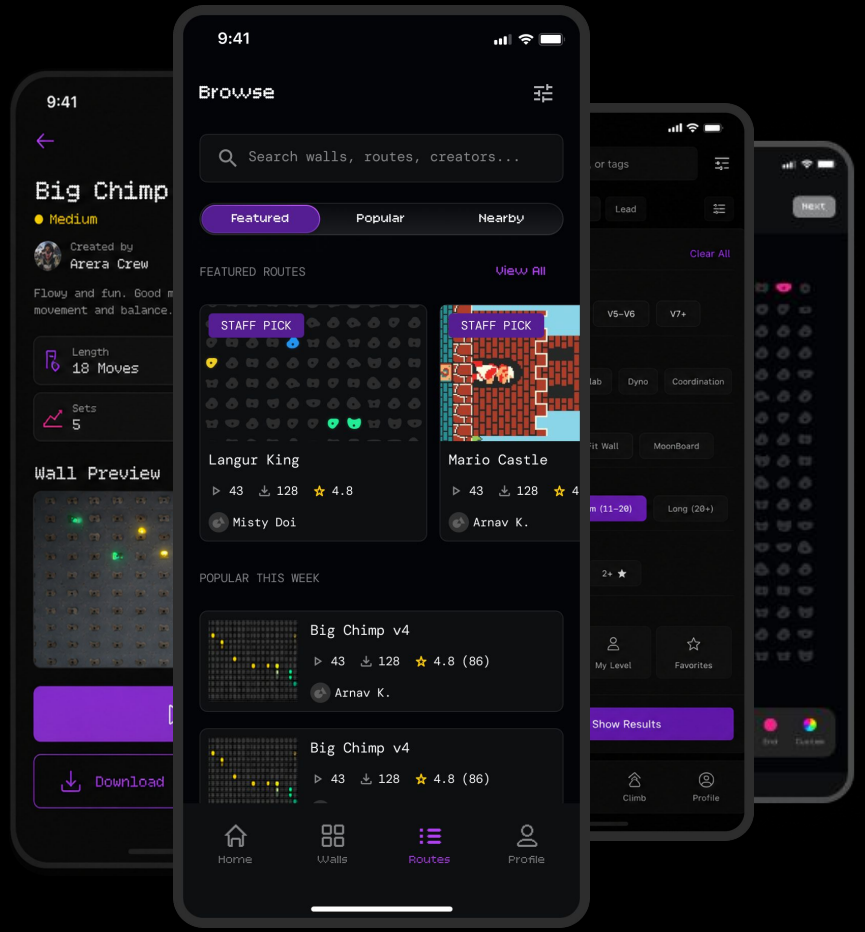

ClimbFit Mobile Application & Route Library

Discover climbing routes and training activities through the ClimbFit app. Select a route, follow illuminated holds and switch between compatible routes without physically resetting the wall.

Explore available routes, build a personal collection and train with activities suited to your wall configuration.

Available on the App Store

GET IT ON Google Play

GAMES & INTERACTIVE FORMATS

Memory Challenge
Follow and reproduce a sequence of illuminated holds to train memory and coordination.

Team Relay
Compete in team-based climbing rounds, passing the challenge between participants.

Alphabets Run
Climb the illuminated holds representing letters in a timed challenge and score points before time runs out.

Multi-Climber Modes
Multiple climbers share the wall in interactive group challenges, competing or collaborating in real time.

INSTALLATION & ONBOARDING

01

Site inspection

Assess the space, ceiling clearance, wall placement and landing area.

02

Design and customization

Finalize the wall configuration, dimensions and layout.

03

Wall and hardware installation

Install the wall and hardware, then test system operation.

04

Custom-fitted matting

Position and fit the impact mats to the approved landing area.

05

App setup

Configure the app, connect the wall and verify route control.

06

Coach onboarding

Introduce coaches to wall operation, route selection, training activities and basic troubleshooting.

Complete site inspection, matting, hardware and coach onboarding. Packages for school curricula, residential clubs and commercial gyms. For more details visit www.climbfit.in/support

CUSTOM SOLUTIONS UNDER DEVELOPMENT

Transform an indoor space into an interactive climbing arena with smart glowing holds technology.

At ClimbFit, we offer custom tailor made interactive LED walls for different sizes and dimensions. Our software stack works with

FUTURE-PROOF YOUR SPORTS & FITNESS INFRASTRUCTURE.

Modular LED climbing systems for schools, residential clubs and commercial gyms.

Explore a configuration tailored to your space, with site assessment, installation and onboarding options.
